EDUCATION

•Bachelor Of Engineering	2020-24
Ramaiah Institute of Technology,Bengaluru	CGPA: 8.6
•D.A.V Public School Koylanagar	2019
Central Board of Secondary Education(C.B.S.E)	Percentage:86

INTERNSHIP & JOB

•Software Engineer DENTSU	Sept 2024 – Present
Java ,springboot ,Python,GenAI	
– Designed and developed GenAI-powered backend services using Python and LLM-based RAG pipelines for automated data summarization, contextual insight generation, and enterprise workflow automation. – Built end-to-end AI orchestration workflows, integrating LLM services with enterprise data sources and backend microservices to support reliable production use cases. – Developed scalable backend services using Python, Java, and Spring Boot, exposing REST APIs and integrating AI/ML components with distributed enterprise systems. – Designed data schemas, retrieval logic, and identity-resolution workflows to provide consistent, context-rich data for downstream LLM and analytics pipelines. – Automated business processes using backend and AI-driven services, reducing manual intervention and improving operational efficiency. – Collaborated with product, business, and engineering stakeholders to take AI and backend solutions from requirements through implementation and production delivery.	
•Research & Development Intern Samsung	Dec 2022 – Aug 2023
Python, PyTorch, GPU Computing, CUDA, Data Pipelines, Model Optimization	
– Implemented DL-based models for high-resolution smoke simulation, improving accuracy and upsampling performance. – Optimized data pipelines and performed large-scale training experiments on GPU environments.	
•Software Development Intern Effigo Global	Jan 2024 – Apr 2024
Java, Spring Boot, ReactJS, CI/CD	
– Developed backend components using Spring Boot to support data pipelines and analytics dashboards. – Implemented CI/CD automation and containerized microservices using Kubernetes for scalable deployments.	
•Algorithm & Backend Consultant Healthflex	Aug 2024 – Sept 2024
Machine Learning, Algorithms	
– Designed ML-driven predictive algorithms to enhance decision-making accuracy and backend intelligence.	

ACHIEVEMENTS

•Among top 3 teams in ACCS by Advanced Communication & Computing	2022
Headquartered at IISc Bengaluru	
•Led college team to be among the only 4 teams qualifying for Formula Bharat	2022
•Ranked among top 6% in JEE Main out of 1,000,000 candidates	2019
•Among top 10% coders on LeetCode; Specialist on Codeforces	2024

TECHNICAL SKILLS

Programming Languages:Java, Javascript, Python, C/C++
Backend Frameworks & APIs: Spring Boot, NestJS, Express.js
Frontend Frameworks: React.js, Next.js
MLOps & DevOps Tools: Docker, Kubernetes, Jenkins
Databases (SQL & NoSQL): PostgreSQL, MySQL, MongoDB, Redis; schema design, indexing, and query optimization
Cloud Platforms:AWS (EC2, S3, Lambda)
Machine Learning & AI: Scikit-learn, PyTorch, TensorFlow, Hugging Face Transformers, LangChain
